

University Library Accomplishments 2010/11

David Lewis
July 20, 2011

1. The 2120 Computer Lab was completed. This innovative instructional space contains 40 computer workstations that can be reconfigured in a variety of layouts. It also provides for a flexible projection system.
2. Planning was begun for Learning Spaces 3. This project will develop space on southeast window wall of Level 4. We will use the same process as Learning Spaces 1 and 2 in the hallways in Education/Social Work and Business/SPEA. Construction should be completed for the Fall semester 2012.
3. Completed the digitization of the *Indianapolis Recorder*, one of the nation's oldest African American newspapers. The collection includes newspapers from the late 19th century through 2005. The collection will be released this fall.
4. The library added the archives of Kiwanis International and the Beldon Fund to the philanthropy archives collections.
